Understanding the Jewish Calendar

What Is the Jewish Calendar?

The Jewish calendar, also known as the Hebrew calendar, is a lunisolar calendar that combines lunar months with solar years. Unlike the Gregorian calendar, which is purely solar, the Jewish calendar ensures that festivals occur in their proper seasons, particularly important for agricultural festivals like Passover and Sukkot.

Key features of the Jewish calendar include:

- Months: 12 lunar months in common years, with an intercalated 13th month (Adar II) added during leap years.
- Years: Counted from the traditional date of the creation of the world, which is 3761 BCE.
- Holidays: Fixed and movable festivals based on lunar months and solar seasons.

Leap Years and the 19-Year Cycle

To synchronize lunar months with the solar year, the Jewish calendar follows a 19-year cycle, adding a leap month (Adar II) seven times within this cycle. The leap years occur in years 3, 6, 8, 11, 14, 17, and 19 of the cycle.
