Strategies for Solving WileyPlus Exercise Questions

Analyzing the Problem Carefully

Before jumping into calculations, students should:

- Read the problem thoroughly to identify what is being asked

- Note key figures such as face value, interest rates, and payment schedules
- Determine whether the bond is issued at face, discount, or premium
- Identify relevant dates and periods for interest calculations

Applying the Appropriate Accounting Method

The most common methods used include:

- **Straight-Line Method:** Simplifies amortization but less accurate
- **Effective Interest Method:** Recognized as the standard approach, providing more precise interest expense calculations

Understanding when and how to apply each method is vital for correct exercise solutions.

Calculating Bond Issuance and Related Journal Entries

Typical steps involve:

- Determine the cash received from issuance based on market rate and face value
- Calculate the amount of discount or premium on bonds
- Record initial journal entries for bond issuance

For example, if bonds are issued at a premium, the journal entry would credit Bonds Payable and debit Cash and Premium on Bonds Payable.

Amortization of Discount or Premium

Amortization affects interest expense and carrying amount:

- Calculate interest expense using the effective interest rate
- Reduce or increase the bond's carrying amount accordingly
- Record periodic amortization entries

Common Types of WileyPlus Chapter 13 Exercises and Their Solutions

Issuance of Bonds at a Premium

Sample Exercise:

"Company issues bonds with a face value of \$100,000 at a 5% coupon rate, but market interest rate is 4%. Bonds are issued at a premium of \$3,000. Prepare the journal entries on issuance and first interest payment."

Solution Outline:

- Record bond issuance:

Debit Cash \$103,000, Credit Bonds Payable \$100,000, Credit Premium on Bonds Payable \$3,000

- First interest payment (assuming semiannual):

Calculate interest expense using effective rate, amortize premium, and record interest payment accordingly

Bond Discount Amortization**Sample Exercise:**

"Bonds with a face value of \$50,000 are issued at a discount of \$2,000. Using the effective interest method, compute interest expense for the first period."

Solution Steps:

- Determine effective interest rate from issuance data
- Compute interest expense:

Interest Expense = Carrying Amount × Effective Interest Rate

- Amortize discount:

Discount Amortized = Interest Expense - Cash Interest Paid

Retiring Bonds Early

Sample Exercise:

"A company retires bonds before maturity at a redemption price of \$105,000. The bonds have a book value of \$102,000. Record the journal entry for retirement."

Solution:

- Debit Bonds Payable for \$102,000
- Debit Loss on Retirement for \$3,000 (difference)
- Credit Cash for \$105,000

This article delves into the intricacies of WileyPlus Intermediate Accounting Chapter 13 exercise answers, providing a detailed, reader-friendly exploration of key topics, common challenges, and effective strategies to master these exercises.

Understanding the Significance of Chapter 13 in Intermediate Accounting

The Core Focus of Chapter 13

Chapter 13 typically centers on long-term liabilities, with a primary emphasis on bonds payable. This chapter guides students through the principles of issuing bonds, calculating interest expenses, amortizing bond premiums or discounts, and understanding the implications of bonds on financial statements.

Why Mastering Chapter 13 Matters

- Practical Application: Bonds are a common financing method for corporations, making this knowledge highly relevant for future accountants and financial analysts.
- Conceptual Clarity: It bridges theoretical understanding with real-world accounting practices, including amortization methods and reporting.
- Exam Preparedness: Mastery of these exercises enhances readiness for exams, certifications, and professional audits.

Key Topics Covered in WileyPlus Chapter 13 Exercises

- Bond Issuance at Par, Premium, and Discount

Bond issuance can occur at face value, above (premium), or below (discount) the face amount. Understanding how to record and interpret these transactions is fundamental.

- At Par: When bonds are issued at their face value, the journal entry is straightforward.
- At Premium: Bonds issued above face value result in a premium, which must be amortized over the life of the bonds.
- At Discount: Bonds issued below face value create a discount, requiring amortization to reflect the true interest expense.

- Amortization of Bond Premiums and Discounts

The two main methods employed are:

- Effective Interest Method: Provides a more accurate reflection of interest expense over time by applying the market rate at issuance.
- Straight-Line Method: Simplifies calculations by evenly amortizing the premium or discount,

though less precise.

Most exercises favor the effective interest method, aligning with GAAP standards.

- Reporting Bond-Related Items in Financial Statements

Understanding how bonds are presented in balance sheets and income statements is critical:

- Bonds payable are recorded as a liability.
- Premiums increase the carrying amount; discounts decrease it.
- Interest expense reflects the amortized amount over periods.

Navigating Common Challenges in WileyPlus Exercises

Challenge 1: Correctly Calculating Amortization

Many students struggle with determining the amortization amount for each period, especially when using the effective interest method. The key steps include:

- Calculating the interest expense: Carrying amount $\times$ market rate.
- Determining the cash interest paid: Face amount $\times$ coupon rate.
- Deriving the amortization amount: Interest expense - Cash interest paid.

Tip: Keep track of the bond's carrying amount after each period to ensure accuracy.

Challenge 2: Differentiating Between Premium and Discount Entries

Misclassification can lead to incorrect journal entries. Remember:

- Premiums increase the bond's carrying amount.
- Discounts decrease it.
- Expenses are affected accordingly over time through amortization.

Challenge 3: Timing and Pattern of Amortization

Understanding the schedule of amortization helps in predicting bond values at any point. Consistent application of the chosen amortization method ensures accurate reflection of bond liability over time.

Step 1: Analyze the Information Provided

Identify:

- Bond face value
- Coupon interest rate
- Market interest rate
- Issue price
- Term of bonds
- Payment frequency

- For bonds issued at premium: Debit Cash, Credit Bonds Payable and Premium on Bonds Payable.
- For bonds issued at discount: Debit Cash, Debit Discount on Bonds Payable, Credit Bonds Payable.

Step 4: Calculate Periodic Interest Payments and Interest Expense

- Use the coupon rate for cash interest.
- Apply the market rate for interest expense via the effective interest method.
