Answer: Triangle

Tips:

- Look for repeating cycles or sequences
- Observe changes in shape, color, size, or orientation

2. Number Series Questions

Candidates are presented with a series of numbers following a particular rule. The task is to determine the next number or the rule governing the sequence.

Example:

2, 4, 8, 16, __?__

Answer: 32 (each number is multiplied by 2)

Tips:

- Check for common differences or ratios
- Look for patterns involving addition, subtraction, multiplication, or division

3. Diagrammatic or Logical Rule Questions

These involve interpreting diagrams or shapes to deduce the underlying rule or relationship.

Example:

Given a set of diagrams showing shapes with different colors and sizes, select the one that completes the pattern.

Tips:

- Focus on the relationship between elements
- Consider symmetry, orientation, or color changes
