- Post entries to appropriate ledger accounts.
- Prepare a trial balance to verify the accuracy of postings.

Adjusting Entries

At the end of an accounting period, adjustments are necessary to reflect true financial position:

- Accruals: Expenses or revenues recognized before cash is exchanged.

Approach:

- Record the purchase in the journal:
 - Debit Equipment R50,000
 - Credit Bank/Retailer R50,000
- Calculate annual depreciation:
 - $R50,000 / 5 = R10,000$ per year
- Adjusting entry at year-end (assuming the financial year ends on 31st March):

Since only one month has passed, depreciation for one month:

- $R10,000 / 12 = R833.33$

- Debit Depreciation Expense R833.33
- Credit Accumulated Depreciation R833.33

This example illustrates the typical depth of questions requiring recording, adjustment, and calculation skills.

Final Tips for Success
