Understanding Picture Sentence Strips: An Overview

Definition and Concept

Picture sentence strips are elongated, laminated cards or strips that combine images with corresponding sentences or phrases. Typically, these strips feature a picture—often colorful and detailed—paired with a sentence that describes or relates to the visual element. The sentences are usually printed beneath or beside the image, creating a direct link between visual recognition and language comprehension.

The core purpose of these strips is to facilitate the association between words and images, thereby reinforcing vocabulary acquisition, sentence structure understanding, and reading comprehension.

They serve as a bridge between concrete visual recognition and abstract language skills, making them particularly effective for emergent readers, students with learning disabilities, and non-native English speakers.

Historical Context and Evolution

The concept of combining images with words to aid learning dates back to the early 20th century, rooted in visual learning theories and the cognitive development of children. Early educational tools relied heavily on picture cards and flashcards, which evolved over decades into more sophisticated formats, including picture sentence strips.

With the advent of age-appropriate educational technology and curriculum development, picture sentence strips gained prominence in the 1970s and 1980s as a tactile, manipulatable resource. Their design has since advanced with digital adaptations, but physical strips remain popular due to their simplicity, durability, and versatility.

Design and Components of Picture Sentence Strips

Core Elements

A typical picture sentence strip contains several key components:

- Visual Image: A clear, colorful picture that depicts a person, object, action, or scene related to the sentence.
- Sentence/Phrase: Text that describes or expands upon the image, often written in simple, age-appropriate language.
- Layout: The arrangement of image and text can vary, but most strips feature the picture at the top or side, with the sentence directly below or beside it.
- Material: Usually laminated cardstock for durability, allowing for repeated handling and use.

Design Variations

Designs can vary based on purpose, age group, and instructional focus:

- Single-Image Strips: Featuring one image with a corresponding sentence, ideal for focused vocabulary or concept teaching.
