Sample Questions and Model Answers from 2013

Sample Question 1: Business Objectives

?Explain two reasons why a business might set specific and measurable objectives.?

Model Answer:

A business might set specific and measurable objectives to provide clear direction and to evaluate progress effectively. For example, setting a target to increase sales by 10% within a year helps the business focus its efforts and assess whether strategies are successful. Additionally, measurable objectives motivate employees by providing tangible goals, which can improve performance and ensure everyone works towards common aims.

Sample Question 2: Marketing Mix

?Describe how a business can use the ?place? element of the marketing mix to reach more customers.?

Model Answer:

A business can use the ?place? element by expanding distribution channels, such as selling products online, opening new stores, or partnering with retailers. For example, by establishing an online shop, the business can reach customers who are geographically distant or prefer shopping online. Additionally, choosing strategic locations for physical stores in high-footfall areas can increase visibility and sales.

Sample Question 3: Financial Analysis

?Calculate the break-even point for a business that sells a product for £20 each, with fixed costs of £10,000 and variable costs of £10 per unit.?

Model Answer:

The contribution margin per unit = Selling price - Variable cost = £20 - £10 = £10

Break-even point (units) = Fixed costs / Contribution margin per unit = £10,000 / £10 = 1,000 units

Therefore, the business needs to sell 1,000 units to cover all costs.
