Defining Perioperative Nursing

Perioperative nursing is a specialized branch of nursing dedicated to providing care to patients undergoing surgical interventions. The term "perioperative" is derived from the Latin words "peri," meaning around, and "operative," relating to surgery. Therefore, perioperative nursing covers the entire peri-surgical period, which includes three primary phases:

The Three Phases of Perioperative Nursing

- **Preoperative phase:** Preparation and planning for surgery, including patient assessment, education, and consent.
- **Intraoperative phase:** Providing direct patient care during the surgical procedure within the operating room.
- **Postoperative phase:** Recovery and follow-up care to ensure patient stability, pain management, and education for ongoing recovery.

Understanding these phases helps clarify the comprehensive scope of perioperative nursing and highlights the need for specialized skills at each stage.

The Roles and Responsibilities of Perioperative Nurses

Perioperative nurses are integral members of the surgical team, working collaboratively with surgeons, anesthesiologists, surgical technologists, and other healthcare professionals. Their roles are diverse and demand a high level of competency, adaptability, and emotional resilience.

Preoperative Responsibilities
