Sample Question 1: Describe the process of river formation and erosion

Model Answer:

River formation begins when surface runoff from rainfall collects in small channels on the land surface. and resource depletion. The expansion of cities leads to deforestation, which reduces biodiversity and disrupts ecosystems. Air and water pollution increase due to vehicles, industries, and improper waste disposal. Urban areas also contribute to the heat island effect, raising local temperatures. Additionally, urbanization strains infrastructure and water supply systems, leading to challenges in sustainable resource management.
